"Very professional, attentive to detail as well as alignment to strategy."

— **Eric DeClouet**, *was Terry's client*

"Terry is an extremely smart and tenacious individual who works through issues to find creative solutions that meet requirements no matter how awkward those requirements may seem. For example, no product can, out-of-the-box, meet any company's full requirements. However, at Wells, Terry made several customizations to our product to adjust it to their needs. These included custom scripting, customizing SQL, and finding better ways of working within the product itself to align the corporate needs and product abilities."

— **Thomas Baird**, *Enterprise Assigned Engineer / TAM, Altiris, was a consultant or contractor to Terry at Wells Fargo*

"I found Terry to be consistently innovative and also conscientious of details. He stood out as always being 'very good' at what he does and that was an invaluable asset to our department. Sincerely, Peter Deppisch"

— **Peter Deppisch**, *Systems Specialist, Bank of Montreal, managed Terry indirectly at Bank of Montreal*

"It was a pleasure working with Terry. I worked with Terry for one year plus, and found him to be an excellent and highly motivated colleague and mentor. His contribution and ideas are now standards in our IT environment throughout Wells Fargo Bank. He was dedicated and available day and night; he provided complex and difficult solutions to each and every person in our group. He also provided a wide range of key designs, automation, and database innovations that are integrated into virtually every process we have in our group. I would highly recommend Terry to any group."

— **Ronald Sanderson**, *Ronald Sanderson, Wells Fargo, worked directly with Terry at Wells Fargo*

"It was great experience working with Terry Gauchat. Working together on projects ,I have learn lot from Terry Like Unix Administration task (Solaris Upgrade , Veritas Volume Manager , Shell scripting and Patch maintenance on all unix platform). He has extensive experience on Database/Unix Administration / System Architecture. He always innovative new ideas in Software Engineering."

— **Dharmendra Inamdar**, *OSE, WFB, worked directly with Terry at Wells Fargo*

"Terry is an extremely technically savvy problem solver. He was instrumental in successfully tackling some of our most insidious issues trying to manage patches and security product updates on 3000+ UNIX servers. He likes to get involved and share his ideas -- Terry is an enthusiastic, front-row participant."

— **Cindy Perry**, *UNIX OS Engineer, Wells Fargo Bank, managed Terry at Wells Fargo*

"Terry was team lead for the sys admin group that handled my data warehouse group's large Unix-based systems. He was detail oriented and a good leader/director of his team's efforts. He was easy to work with and always followed through. I highly recommend him; he is a good man to work with."

— **Albert Langlitz**, *Technical Architect, Wells Fargo, worked with Terry at Wells Fargo*

"Terry was a great asset to our team. As one of the senior engineers, Terry provided expert solutions for a wide variety of technical problems and always came up with innovative solutions. Terry was also a great mentor and teacher. He demonstrated a unique blend of patience and skill and was always willing to spend the extra time to coach less experienced teammates."

— **Rick Patterson**, *Systems Engineer, Wells Fargo, worked indirectly for Terry at Wells Fargo*

"I enjoyed working with Terry Gauchat very much for the past couple of years. We had some special opportunities to creatively learn and deploy new technologies to accomplish automatic security patching goals. Terry enjoyed discussing ideas, and demonstrating what he learned and what the technology could do. Terry is a very passionate and result oriented technology professional. I highly recommend him."

— **Terry Cheng**, *Operating System Engineering, Wells Fargo, worked with Terry at Wells Fargo*

"Terry was a pleasure to work with. I really respect his intellect, dedication and passion to his work. He uniquely possesses both very keen technical skills as well as sharp business consultant capabilities and applies them to ITIL "IT Service Management" foundations whenever possible. Terry came up with and implemented numerous innovative ideas for enhancing our patch management process (i.e., automation) and patch management tool engineering, thereby saving our team countless hours of manual efforts. Terry was a very technical lead engineer for our group, performing a remarkably large number of accomplishments over the past year. In doing so, he "wore many hats", which included acting as a lead technical engineer, technical consultant, database designer/architect/dba, VB scripter, etc to automate and improve our current processes. Terry is exceptional at cross-training other members of the team. He is really patient and openly shares knowledge. Terry's ability to familiarize himself to and learn new tools/technologies/scripts, then readily apply them in order to see his ideas turn into fruition, is extraordinary. The caliber of work that Terry performs is really exceptional – he was a tremendous asset for our group."

— **Sara French**, *Team Lead, Wells Fargo*, worked directly with Terry at Wells Fargo

"A highly knowledgeable professional, Terry is always ready to generously share his knowledge and solution ideas with colleagues. Terry really enjoys helping and teaching people and can be considered a professional mentor in this field. His brilliant analogies and metaphors make the most complex concepts and ideas understandable to everyone. This leads to successful collaborative implementations."

— **Vladimir Anisimov**, *Applications Systems Engineer, SoftLine Consulting*, worked with Terry at Wells Fargo

"As a more senior engineer, Terry has been an excellent mentor for me in terms of writing code and evaluating vended software products for use within the enterprise. Thanks Terry!"

— **Matt Ludka**, *Operating Systems Engineer, Wells Fargo*, worked indirectly for Terry at Wells Fargo

"I highly recommend Terry. Terry and I worked together on many projects at Providian Financial. Terry provided Database services for many of my projects. Terry's professionalism and knowledge contributed tremendously to the success of our projects."

— **Renato Sousa**, *Senior Manager, Providian Financial*, worked with Terry at Providian Financial

"Terry was very innovative and creative in developing solutions to our software distribution problems and database management. He spent patient effort to share his ideas and skills with me. His background is very broad and I can always count on him for help for the most diverse of questions."

— **Irina Kim**, *Operating Systems Engineer, WFB*, worked directly with Terry at Wells Fargo

"Terry Gauchat was a key technical employee during the time I worked at Providian. His expertise was both broad and deep in client/server systems, development, and database administration. I highly recommend Terry, and I believe that he will be a strong technical asset to any employer."

— **Stan Eads**, *Manager, Unix Systems, Providian Financial*, managed Terry indirectly at Providian Financial
